REMARKS

25X1

[REDACTED] 1. The STENDAL-BORSTEL (M 53/Y 75) airfield was occupied to capacity on 23 July 1949. The air force units stationed at the field were equipped with motor vehicles [REDACTED]

25X1

[REDACTED] A technical unit (wearing black epaulets). [REDACTED]

25X1

[REDACTED] was also stationed at the field. There was little flying with the fighters stationed at the field. Night flights with position lights were performed with these aircraft several times during May and June 1949.

25X1 [REDACTED] Comment

a. Report confirms the previously assumed occupation of the STENDAL-BORSTEL airfield by a fighter unit without stating the number of aircraft stationed there. Most of the fighters stationed at this airfield are Yaks. According to observations of June 1949, IAs are also stationed there. Since night flights were previously repeatedly reported it must be assumed that a night fighter unit of presumably one regiment is stationed in STENDAL-BORSTEL.
